

KONINTI ABHILASH

Data Analyst | Business Analyst | Machine Learning

Hyderabad, India | konintiabhilash2@gmail.com | +91-7780605283 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

B.Tech graduate in Artificial Intelligence and Machine Learning with hands-on project experience in customer analytics, churn prediction, segmentation, and revenue analysis. Built end-to-end projects on banking and e-commerce datasets covering SQL analysis, machine learning models, and Power BI dashboards. Google Data Analytics and Stanford Machine Learning certified, with a working understanding of both the technical execution and the business context behind the data.

TECHNICAL SKILLS

SQL: MySQL, PostgreSQL, Joins, CTEs, Window Functions (RANK, NTILE), Subqueries, Aggregations, Data Extraction and Validation

Python: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, EDA, Data Cleaning, ETL Workflows, Feature Engineering

Machine Learning: Random Forest, Decision Tree, SVM, K-Means Clustering, PCA, Model Training and Evaluation (Accuracy, Precision, Recall, F1)

Power BI: DAX, Power Query, KPI Dashboards, Data Modeling, Slicers, Drill-through, Reporting Automation

Analytics: Customer Segmentation, Churn Analysis, CLV Analysis, Revenue Analysis, Trend Analysis, Statistical Analysis, Predictive Analytics

Excel: Pivot Tables, VLOOKUP, XLOOKUP, INDEX-MATCH, SUMIF, Advanced Formulas, MIS Reports, Dashboards

Tools: GitHub, Jupyter Notebook, VS Code, Google Colab, MS PowerPoint

PROJECTS

Digital Banking Customer Intelligence Dashboard

Python, MySQL, Scikit-learn, Power BI, Excel | 2026

- Analyzed 2,512 banking transactions across 495 customers; cleaned and preprocessed data, fixed null values, and engineered 8 features for model training.
- Applied K-Means clustering to segment customers into 4 behavioral groups based on transaction patterns and engagement.
- Built a Random Forest model for fraud and churn prediction with 85% accuracy, flagging 190 high-risk customers for retention action.
- Wrote SQL queries using CTEs, RANK, and NTILE to surface \$747K in revenue patterns by customer tier; delivered an 8-visual Power BI dashboard with KPI cards, churn risk tracking, and dynamic slicers.

E-Commerce Customer Churn Analysis and Revenue Optimization

Python, SQL, Power BI, Excel | 2025

- Analyzed 5,630 customer records through a full ETL pipeline, cleaning and structuring raw transactional data for analysis.
- Identified an overall churn rate of 16.84% and retention rate of 83.16%; calculated Customer Lifetime Value (CLV) by segment using SQL.
- Conducted root cause analysis and found new customers with zero tenure were the highest churn segment, driving the majority of losses.
- Delivered a 7-visual Power BI dashboard and a written business recommendation report proposing an onboarding strategy to reduce projected churn.

Network Intrusion Detection Using Ensemble Machine Learning

Python, Scikit-learn, Pandas, NumPy | 2026

- Built a machine learning-based intrusion detection system using the NSL-KDD and CIC-IDS 2017 datasets covering four major attack categories.
- Applied PCA for dimensionality reduction to improve model efficiency on high-dimensional network traffic data.
- Trained and compared Decision Tree, Random Forest, and SVM classifiers to identify malicious network activity.
- Random Forest delivered the best accuracy across all four attack categories, outperforming the other two models.

EXPERIENCE

Data Analytics Projects, Academic Experience

JB Institute of Engineering and Technology, Hyderabad | 2025 to 2026

- Worked end to end on customer analytics projects covering data cleaning, EDA, machine learning model building, SQL analysis, and Power BI dashboard delivery; presented findings to evaluation panels with clear business recommendations.

EDUCATION

B.Tech in Artificial Intelligence and Machine Learning

JB Institute of Engineering and Technology, Hyderabad | 2026 Graduate

CERTIFICATIONS

- Google Data Analytics Professional Certificate, Coursera, 2026 | Credential ID: GKACZ31W22A0
- Supervised Machine Learning: Regression and Classification, Stanford / DeepLearning.AI, 2024 | ID: IC4Z0CNVNUWY
- Data Analytics Job Simulation, Deloitte Australia via Forage, 2026
